Powered Excavator Pontoon

Due to the success of the unpowered mini digger pontoons we have designed and built a powered version.

With all the advantages of the mini digger pontoon, including being able to track a mini digger on/off the towpath and down into the bottom of the boat for transport, but being self-powered makes this the ideal package to carry out piling, nicospan or dredging works.

Being only 40ft and weighing 8tonne we can still deliver this craft by hiab lorry, therefore reducing mobilisation costs and timescales.

- ✓ LENGTH – 40FT
- ✓ WEIGHT – 8 TONNE FOR EASE OF TRANSPORTING BY HIAB
- ✓ WIDTH – 6FT 8” WITHOUT SIDE STABILITY TANKS (EXTRA STABILITY TANKS CAN BE ADDED IF NEEDED)
- ✓ DRAFT – 700 MM LOADED
- ✓ TRANSPORTABLE BY HIAB
- ✓ FOUR HYDRAULIC SPUD LEGS TO PROVIDE STABLE PLATFORM
- ✓ SELF-PROPELLED
- ✓ SEPARATE LOCKABLE STORAGE AREA
- ✓ MAXIMUM SIZE OF MACHINE TO BE USED ON PLATFORM 2.5TONNE
