## Wide Beam Crane Pontoon

A specialist, purpose built vessel capable of a maximum lift of 6 tonne, maximum outward reach of 8 m and an upward reach of 10m. Ideally suited to a range of lifting operations from piling to lock gate removal/installation. There is a large loading/materials storage area behind the crane.

It is fitted with a small hydraulic power pack which operates the four stability jack legs which makes it an extremely stable working platform.

It can turn through 90° to allow for easy loading & unloading of materials and machinery.

Easy to transport via hiab lorry as modular. Crane can be lifted on and off very quickly to enable up to an 8 tonne excavator to be tracked on.

- ✓ CRANE – PALFINGER PK23002  
(CONTINUOUS 360°)
- ✓ LENGTH – 26FT
- ✓ WEIGHT – 12 TONNE WHICH BREAKS  
DOWN TO 4 TONNE MODULES FOR EASE OF  
TRANSPORTING BY HIAB
- ✓ WIDTH – 13FT 6” WITHOUT SIDE  
STABILITY TANKS (EXTRA STABILITY TANKS  
CAN BE ADDED IF NEEDED)
- ✓ DRAFT – 450 MM EMPTY, 600mm LOADED  
WITH 6 TONNE

PK 23080 B
